Summary

Software Developer with a strong foundation in Java, SQL, and problem-solving. I'm capable of developing projects related to Machine Learning and AI, along with web applications and I'm skilled in building efficient solutions and continuously learning new technologies in fast-paced environments.

Skills

Programming & Querying: SQL, Java

Frontend Technologies: HTML, CSS, JavaScript, React, Bootstrap

Tools & Platforms: Android Studio

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS

Experience

Software Developer Intern

May 2024 – June 2024

Raiden Studios (On-site)

Tools Used: Unity, Kinect, Virtual Reality (VR), C# (Unity scripting)

- **Developed a VR-based Gamified Fitness Application** using Unity and Kinect for real-time motion tracking and interactive user experience.
- Implemented movement comparison algorithms to evaluate user exercises against predefined trainer models, generating accuracy-based feedback.
- Designed a real-time performance evaluation system to improve exercise correctness and user engagement through instant insights.
- Enhanced system usability by optimizing motion detection, UI interactions, and overall application performance.

Projects

School Zone Traffic Control System | Python, IoT, HTML, PHP, JS

December 2023

- **Engineered an IoT-enabled Traffic Monitoring System** using Python, PHP, and JavaScript, improving real-time vehicle tracking and reporting accuracy.
- Developed a real-time data streaming and visualization module, enabling continuous monitoring via a web dashboard.
- Integrated automated safety alerts, reducing response time to potential risks in school zones.

Missing Person Identification from CCTV | MTCNN, Deep Face, Image Processing

Aug 2024 – Nov 2024

- Built a face recognition system using MTCNN and DeepFace to detect and verify individuals in group images.
- Implemented feature extraction and similarity matching using OpenCV techniques (SIFT, Haar Cascade).
- Enhanced detection with pattern recognition and attribute analysis (gender, spectacles).

Awards & Certifications

- **Big Data Computing Certification – NPTEL (2023):** Completed an 8-week NPTEL certification in Big Data Computing with 96%, covering big data processing and distributed computing concepts.
- **SIH Finalist of Hardware Edition (2023):** Recognized among top teams nationwide for developing an innovative hardware-based solution.
- **AWS certification (2024):** AWS Cloud Architect certified with a strong understanding of designing scalable, secure, and efficient cloud solutions

Education

B.Tech Information Technology

Expected Graduation: 2026

Thiagarajar College of Engineering, Madurai

CGPA: 8.45 / 10
